Professional Summary

Software Engineer with 7+ years of experience designing and delivering enterprise-grade software across the billing, financial services, ERP, and higher education sectors. Experienced in building scalable full-stack applications using Angular, TypeScript, C#, ASP.NET, GraphQL, SQL Server, and Azure DevOps, with expertise in backend API development, dashboard development, financial reporting, business process automation, and enterprise billing platforms.

Strong background in technical ownership, solution architecture, stakeholder collaboration and end-to-end product delivery, with proven success delivering business-critical billing and financial platforms. Passionate about building maintainable software that solves complex business problems and creates measurable value.

Technical Skills

- **Programming:** C#, TypeScript, JavaScript, Python, SQL, HTML5, CSS3
- **Frontend:** Angular, RxJS, Apollo GraphQL, Bootstrap
- **Backend:** ASP.NET, Entity Framework, GraphQL APIs, REST APIs
- **Database:** Microsoft SQL Server, SQL Query Optimisation, Stored Procedures
- **Reporting & Analytics:** Dashboard Development, Invoice Reporting, Margin Reporting, Financial Reporting, Business Reporting, Interactive Charts, Data Visualisation, KPI Reporting, Operational Reporting
- **DevOps:** Azure DevOps, Git, CI/CD Pipelines, Version Control, Release Management
- **Practices:** Agile, SOLID, OOP, Microservices Architecture, Performance Optimisation, Production Support

Professional Experience

Software Developer | Brave New World | Dec 2022 – Present

- Owned the end-to-end design, architecture, development and delivery of core billing platform functionality, making key technical decisions and establishing scalable solutions that continue to support business growth.
- Collaborated closely with billing leaders, operational stakeholders and business users to gather requirements, refine product functionality and provide technical insights that influenced product direction and delivery priorities.
- Supported monthly bill runs by working cross-functionally with billing, finance and operational teams, performing SQL-based data analysis, investigating billing exceptions and resolving data-related issues to ensure accurate and timely customer billing.
- Designed and delivered core modules of a large-scale enterprise Managed Billing platform, developing a comprehensive Billing Portal supporting customer billing, product catalogues, tariffs, invoices, fixed charges, financial operations, reporting, and business process automation.

- Delivered full-stack solutions using Angular, TypeScript, C#, ASP.NET, GraphQL and SQL Server while managing CI/CD pipelines, version control and releases through Azure DevOps and Git.
- Designed secure operational dashboards providing real-time visibility into billing performance, financial metrics, invoices and KPIs, with role-based access and self-service invoice downloads.
- Designed Invoice and Margin Reporting modules enabling finance teams to validate billing accuracy, analyse profitability and approve end-of-cycle bill runs for financial sign-off.
- Designed an API-driven data upload framework automating validation, transformation, exception handling and billing data processing, eliminating 4–5 days of manual effort per cycle and reducing support requests after data loads.
- Architected self-service Reset and Recost Suspense functionality enabling users to run costing jobs, monitor status and resolve validation issues independently, reducing engineering dependency and accelerating financial processing.

Data Analyst (Part-Time) | University of Bath | Nov 2021 – Oct 2022

- Managed academic datasets supporting institutional systems through data validation, reporting and quality assurance.
- Collaborated with university stakeholders to maintain accurate course information and improve data integrity.

Application Development Analyst | Accenture | Dec 2020 – Sep 2021

- Led development activities across enterprise financial applications while mentoring three junior developers.
- Owned end-to-end delivery of software enhancements from requirement analysis through development, testing, deployment, and production support.
- Investigated production issues, performed root cause analysis, and implemented permanent technical solutions.
- Received the Accenture Celebrates Excellence Award for outstanding project delivery and exceptional client satisfaction.

Application Development Associate | Accenture | Nov 2018 – Dec 2020

- Developed enterprise applications using Oracle PeopleSoft FSCM, SQL and PeopleCode.
- Performed testing, production support and deployment activities.
- Worked across Accounts Payable, Accounts Receivable, Purchase Orders and General Ledger modules.

Education

MSc Computer Science – University of Bath (2021–2022)

Bachelor of Technology, Electronics Engineering (2014–2018)

Key project highlights

Enterprise Billing Platform- Designed and delivered a large-scale enterprise billing platform supporting invoice generation, tariff management, product catalogues, customer billing, and financial processing through scalable full-stack development.

API-Driven Business Processing- Designed backend processing services supporting Data Upload, Reset, and Recost Suspense workflows involving complex financial validations, business rules, API integrations, and automated processing.
